

# Simple Amps - TRAVELER

Simple Amps is proud to present the "Traveler" series of guitar amps. This adds a mid-line price point compared to our "Big Iron" series of amplifiers. Even though it comes in at two-thirds the retail of it's bigger siblings the "Traveler" is tricked out with quality components such as Sozo capacitors, Mercury Magnetics transformers and custom made carbon film resistors. A simple two stage preamp and pair of output tubes drive a Jensen 10" MOD speaker mounted in a 9 Ply (1/2) baltic birch cabinet with a heavy duty ruggedized finish. The "Traveler" brings a surprising roar to the table in spite of it's diminutive size. **Available with 6V6,s, 6L6,s or EL34,s.**

**Tone,**  
it's just that  
**simple.**

# Specification - TRAVELER

*All Traveler models have a 1x10 Combo Configuration.*
